THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

ALLOWANCE

1. This action is in response to Applicant's amendment filed on 5/7/08. Claims 1-14 are canceled. Claims 15-30 are added. Thus, claims 15-30 are presented for further examination.
2. Claims 15 and 30 are to be amended by the examiner's amendment below. Claims 15-30 are allowed.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jonathan Sherer, Reg. No. 29,851 on 08/08/2008.

4. Claims 15 and 30 have been amended as follows:

Claim 15:

A messaging gateway comprising:

a network node layer including modular network nodes for interfacing with mobile devices of a plurality of different communication standards to receive content or service requests from the mobile devices and to route responses to the mobile devices;

a gateway node layer including modular gateway nodes for routing the requests and the responses and for modifying the requests and responses according to device technology and content attributes;

an application access node layer including modular application access nodes for accessing content servers and application servers;

an API framework for creating network, gateway, and access nodes; and

wherein the network nodes:

manage context for a device making a request, and convert an input into a Web request using input data, device context, and application context;

add user and location context to requests;

translate responses into a device-specific format using response data, device context, and application context;

update and store context between device interactions; include a plurality of adapters, each said adapter associated with a type of mobile device and sheltering application servers and content servers from device capabilities; and

wherein the gateway nodes provide a series of configurable routing, validation, and filtering functions that provide content and routing management of messaging traffic that passes through the gateway node layer, and in which the service provided by the gateway node layer is determined by the a path taken through said gateway nodes, and in which:

the gateway nodes control access to Web applications according to user subscriptions, in which responses are split up and routed according to adapter capabilities, content attributes, and user-specified rules,

a filter gateway node processes messages and forwards them in a structured manner, its functionality allowing it to modify or delete a message,

a router gateway node has functionality for routing messages to other nodes according to message contents, gateway parameters, gateway loading, service context, and address information, and

the gateway nodes include database gateway nodes for accessing a database.

Claim 30:

A computer program product stored on a gateway comprising:

software code for executing on one or more computers, in which the code is arranged to implement:

a network node layer including modular network nodes for interfacing with mobile

devices of a plurality of different communication standards to receive content or service requests from the mobile devices and to route responses to the mobile devices;

a gateway node layer including modular gateway nodes for routing the requests and the responses and for modifying the requests and responses according to device technology and content attributes;

an application access node layer including modular application access nodes for accessing content servers and application servers;

an API framework for creating network, gateway, and access nodes; and

wherein the network nodes:

manage context for a device making a request, and convert an input into a Web request using input data, device context, and application context;

add user and location context to requests;

translate responses into a device-specific format using response data, device context, and application context;

update and store context between device interactions; include a plurality of adapters, each said adapter associated with a type of mobile device and sheltering application servers and content servers from device capabilities; and wherein the gateway nodes provide a series of configurable routing, validation, and filtering functions that provide content and routing management of messaging traffic that passes through the gateway node layer, and in which the service provided by the gateway node layer is determined by the a path taken through said gateway nodes, and in which:

the gateway nodes control access to Web applications according to user subscriptions, in which responses are split up and routed according to adapter capabilities, content attributes, and user-specified rules,

a filter gateway node processes messages and forwards them in a structured manner, its functionality allowing it to modify or delete a message,

a router gateway node has functionality for routing messages to other nodes according to message contents, gateway parameters, gateway loading, service context, and address information, and

the gateway nodes include database gateway nodes for accessing a database.

Allowable Subject Matter

5. The following is an examiner's statement of reasons for allowance:

The independent claims distinguish themselves over the prior art by delineating a gateway and program product comprising three layers for interfacing with mobile devices, routing and modifying requests based on the devices and attributes, and providing access to servers. Each of these layers contain various nodes that are responsible for different functionality as a request is routed through the gateway. The network layer contain nodes for managing the context of a request, converting inputs based on input data, device context, and application context, and adding user and location context to requests. The gateway layer contain nodes for configurable routing, validating, and filtering messages as they pass through the layer. The gateway layer comprises additional nodes that control access to applications, route responses according to adapter capabilities, content attributes, and rules, processing and forming messages, and routing messages to other nodes according to the message contents, gateway parameters, gateway loading, and service context. By the combination of these elements and functionality the independent claims now clearly and distinctly describe the important features of the open messaging gateway and thus independent claims 15 and 30 show a patentable distinction over the prior art. Furthermore, the prior art gives no indication that it would have been obvious to one of ordinary skill in the art to have constructed a gateway in the specific fashion presented in these claims.

Claims 16-29 are allowed due to their dependence on the independent claims discussed above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
